5 KNUCKLE FULL MORTISE HINGES

Heavy Weight Ball Bearing

- FBB168 – (ANSI A8111) Steel – polished and plated or phosphated and prime coated for painting
 FBB199 – (ANSI A2111) Brass or bronze – polished and plated or painted
 FBB199 (32) – (ANSI A5111) Stainless steel – highly polished
 FBB199 (32D) – (ANSI A5111) Stainless steel – satin finish

- For use on heavy doors or doors where high frequency is expected such as entrance doors to office buildings, stores, public buildings and corridor entrance doors to offices
- All hinges have template screw hole location for use on either wood or hollow metal doors and frames
- Equipped with four Stanley permanently lubricated non-detachable ball bearings
- Pins in non-ferrous hinges are stainless steel
- Hole in bottom tip for easy pin removal
- Reversible flush tips and pins
- Hinges can be furnished as follows:
 - with raised barrel (RB)
 - with electric wires and/or switches (CE and/or CS)
 - with hospital tips (HT)
 - with decorative tips
 - with security studs
 - with non-removable pins (NRP)

5 KNUCKLE FULL MORTISE HINGES

Standard Weight Ball Bearing

FBB179 – (ANSI A8112) Steel – polished and plated or phosphated and prime coated for painting

FBB191 – (ANSI A2112) Brass or bronze – polished and plated or painted

FBB191 (32) – (ANSI A5112) Stainless steel – highly polished

FBB191 (32D) – (ANSI A5112) Stainless steel – satin finish

- For medium weight doors of average frequency
- All hinges have template screw hole location for use on either wood or hollow metal doors and frames
- Equipped with two Stanley permanently lubricated non-detachable ball bearings
- Pins in non-ferrous hinges are stainless steel
- Hole in bottom tip for easy pin removal
- Reversible flush tips and pins
- Hinges can be furnished as follows:
 - with raised barrel (RB)
 - with electric wires and/or switches (CE and/or CS)
 - with hospital tips (HT)
 - with decorative tips
 - with security studs
 - with non-removable pins (NRP)

Pocket Door Hardware

PDF150N & PDF250N

150lbs & 250lbs Panel Pocket Frames

PDF150N - For installation of pocket or bi-parting doors up to 3' wide and up to 8' high, weighing up to 150 lbs each

PDF250N - For installation of pocket or bi-parting doors up to 4' wide and up to 8' high, weighing up to 250 lbs each

Features

- Steel wrap around stiffener reinforced split jambs
- Four large 1" wheels for easy rolling action
- PDF150N Supports panels weighing up to 150 lbs
- PDF250N Supports panels weighing up to 250 lbs
- Easy-to-install feature makes installation a "snap"
- V-groove jump proof track
- Cut marks on header for easy sizing

ANSI Reference

All conform to ANSI A156.14 type D8671, D8701

Cross Reference

Sizing Information

Finished Rough Opening

Opening Width = Door width multiplied by 2, add 1 1/4"
For Bi Part – Sum of 2 Doors, multiplied by 2, add 1/4"

PDF150N kits are sized for 3'0" door and PDF250N kits are sized for 4'0" door. Both can be cut down to accomodate smaller door widths.

Kits are sized for 6'8", 7'0" or 8'0" door height and can be cut shorter at installation

Rough Opening Height for Single Doors

For bi-parting application refer to installation instructions

Installation Detail

Heavy Duty Detention Floor Stops

3001 – Black neoprene floor stop

- Meets industry standard for 300 pound impact testing
- 90 Durometer
- Steel anchor post $\frac{5}{8}$ " diameter x 2 $\frac{1}{2}$ " long
- For concrete floors in security applications

3001 EDP Number	Diameter		Height		Steel Anchor Post		Quantity Per Carton	Carton Weight	
	Inches	(mm)	Inches	(mm)	Inches	(mm)		LBS.	(Kg)
81 – 1000	2"	(51)	1 $\frac{1}{2}$ "	(38)	$\frac{5}{8}$ " x 2 $\frac{1}{2}$ "	(15.9 x 63.5)	25	15	(6.8)

Heavy Duty Wall Stops

3002– Black neoprene wall stop

- Unique designed molded anti-rotational post resists unauthorized removal of stop
- 90 Durometer
- For concrete or cinder block walls in security applications
- Convex design

3002 EDP Number	Diameter		Projection		Security Torx Fastener		Quantity Per Carton	Carton Weight

Certifications – UL Listed:

Listed by Underwriter's Laboratories for use on 3 Hr, A label single swinging doors (4'x10'). GYJT Builders Hardware-single point locks or latches.

**American National Standard:**

ANSI A156.2, Series 4000 Grade 1
California Fire Code NOA ANSI A250.13
Listed.

Finish – (BHMA)	US	DESCRIPTION
605	3	bright brass
606	4	satin brass
611	9	bright bronze
612	10	satin bronze
613	10B	oxidized satin bronze, oil rubbed
618	14	bright nickel plated
619	15	satin nickel plated
622	19	flat black
625	26	bright chromium plated
626	26D	satin chromium plated
690	20	dark bronze

Backset – 2 3/4" standard, 3 3/4" and 5" available.

Chassis – Critical latch and chassis components are brass or corrosion-treated steel. 2 1/16" diameter to fit 2 1/8" hole in door (Conforms to ANSI A115.2). Lost Motion feature available as an option. (see page 5 for options/features)

Door thickness – Available for 1 3/4" to 2 1/4" doors.
Spacers available for 1 3/8" doors.

Latch – Solid brass 9/16" throw. Front 2 1/4" x 1 1/8" beveled.

Lever handles – Lever handles are a high-quality zinc alloy. Trim components are brass or bronze. Body is approximately 1 5/8" in diameter; Handle is approximately 4 3/4" long (from center-line of chassis). #14 and #15 levers conform to California Administrative Code Title 19 and Title 24. All three styles of levers conform to the Illinois Accessibility Standard.

Mounting – In addition to standard door preparation (ANSI A115.2 for 1 3/4" doors), two additional holes are needed for through-bolts. Through-bolts require two 5/16" diameter holes located at 12 o'clock and 6 o'clock positions. A drill jig is provided to insure accuracy of the holes. (see KD303 page 5).

Projection on door – Approximately 2 3/4" when mounted on 1 3/4" door.

Roses – C - 3" Convex
D - 3 1/2" Convex
K - 3" Convex - no ring
L - 3 1/2" Convex - no ring

Strike – STK: Conforms to ANSI A115.2 (2 3/4" x 1 1/8" with curved lip & box). S3: Conforms to ANSI A115.2 for 1 3/4" doors (4 7/8" x 1 1/4" with curved lip). S3-7/8: Conforms to ANSI A115.2 for 1 3/4" doors (4 7/8" x 1 7/8" flat)

1E SERIES — FEATURES

1E Mortise Cylinder

Standard mortise applications require use of BEST's 1E series cylinders with standard 1E-C4 cam. BEST cylinders may be altered to function with other manufacturers' locks by use of different cams (see page 8) and different cylinder rings (see page 9). Special cylinder variations are available for most applications (see pages 4 & 5). BEST cylinders are machined from brass or bronze bar stock and are available in a variety of finishes. Additional security is provided by a set screw that mounts diagonally in the cylinder wall and when tightened, holds the cylinder securely in the housing. BEST mortise cylinders feature the BEST interchangeable core and may be master-keyed into any existing BEST system. Contact your local Stanley Security Solutions sales office for information on special cylinder applications not listed in this catalog.

1E Rim Cylinder

Standard rim cylinder applications require the use of BEST's 1E rim cylinder series. BEST rim cylinders are interchangeable with other manufacturers' rim cylinders. BEST rim cylinders are machined from solid bar stock and are available in a variety of finishes. The standard package for the BEST rim cylinder includes cylinder, RP3 ring package, 1E-S2 spindle, clamp plate and clamp plate screws. BEST rim cylinders feature the BEST interchangeable core and may be master-keyed into any existing Best system.

MORTISE AND

1E HIGH SECURITY CYLINDERS

1EJ7J4 – 1EK7K4 Cylinder Features

Designed for high security applications, BEST offers the 1EJ7J4 high security cylinder and special 5C interchangeable core. This special cylinder is listed by Underwriters Laboratories as meeting UL437 standard for key locks. The cylinder provides additional strength through a hardened stainless steel alloy ring, face and keyway disc. Cylinder also conforms to ANSI A156.5 mortise cylinder, Grade 1A. The 1EJ7J4 cylinder must be combined at the factory. The 1EK7K4 cylinder is available where UL listing is not a requirement, and can be ordered uncombined.

NOTE: Both 1EJ7J4 and 1EK7K4 require long blade key for operation.

1EJ7J4 – 1EK7K4 Cylinder Specifications

Diameter: 1 7/8", 1.150-32 (NS-2A) threaded mortise cylinder.

Mounting length: 7 pin – 1 1/16".

Material: Brass (cylinder) and stainless steel ring.

Finish: 630 (nickel plated satin stainless steel material).

Cylinder rings: High security wrench resistant, machined from stainless steel, hardened, and nickel plated. Special door preparation required.

Diameter of hole 1 3/4".

Cylinder face, Keyway disc: Stainless steel, hardened Cam:

Supplied with C258 cam. See page 8 for special cams.

To order: Designate "J4" or "K4" on Step "C" order procedure. (see page 2.)

1EK7K4 High Security Cylinder

CORMAX™ PATENTED KEYING SYSTEM

BEST™ CORMAX™ is the premier patented keying system offered by Stanley Security Solutions. CORMAX will meet your needs for security, key control, and convenience. A simple solution with no compromising allowed.

CORMAX is the upgrade path for existing BEST Standard, Premium, and MX8 customers; and it is an essential element of non-residential access control as security administrators strive to eliminate the unauthorized duplication of keys.

CORMAX™
Patented Keying System

CORMAX offers the following features and benefits:

- A long-term US utility patent that guarantees the extended useful life of the system through 2027.
- A second, independent locking mechanism that utilizes a patented set of built-in side pins to provide higher security.
- Several levels of geographical exclusivity, including national exclusivity, are available via the patented side pin feature.
- CORMAX cores and keys are available exclusively through Stanley sales offices. Key blanks are only sold to individuals authorized by the customer to ensure key blanks do not end up in the possession of unauthorized personnel either inside or outside the customer's facility.
- CORMAX cores are certified to meet the security, safety, and reliability requirements of BHMA A156.5 Grade 1.
- Picking and drilling resistance options are available if higher levels of security are desired.
- Complete factory masterkeying service offered, and at no charge with purchase of BEST locksets and PHI exit devices.
- Keyways are organized in families of four keyways each, with double-milled and quad-milled key levels to facilitate the design of masterkey systems in multi-building campuses.
- BEST CORMAX cores are compatible with all existing BEST interchangeable core housings, eliminating the need for new or modified locksets.

Gate EMLock® 1570 Series

Electromagnetic Gate Locks Magnetic Bond Sensor Standard

SDC's Gate EMLock® provides 1200lbs of holding force and enables the access and egress control of pedestrian and vehicle gates. Access controls such as card readers, digital keypads and remote control stations provide gate and lock control.

Gate EMLocks are compatible with manual and automatic, swinging and sliding, tubular and iron gates. The floating armature design compensates for gate misalignment with the electromagnet.

Weatherized

SDC Gate EMLocks are totally sealed in an epoxy filled stainless steel case. A threaded conduit fitting ensures weather resistant protection of the wiring.

Application

With no moving parts to bind or wear, the Gate EMLock® is inherently failsafe and will unlock automatically during a power outage. For security applications, the SDC 600 series power supplies with battery backup capability, provide continuous operation for up to 35 hours with just two 12VDC, 7 Amp Hour batteries.

Features

- Stainless Steel Case
- Epoxy filled for weather resistance
- Threaded conduit fitting
- Built-in voltage kickback protection
- Low power consumption
- Built-in bond sensor (BAS)

Model

- 1575U** Standard mounting with magnetic bond sensor
1576U Face drilled with magnetic bond sensor

Options

- 1576-BK** Mounting "L" bracket for 1576
1576-MP Mounting plate for 1576
1576-ZB Armature "Z" bracket for 1576
1576-AB Armature angle bracket for 1576
BR64 Full wave bridge rectifier for AC operation

Specifications

Electrical Specifications

- Holding Force** 1200lbs
Voltage Input: 450mA @ 12VDC
225mA @ 24VDC

Bond Sensor

- Output:** 125mA @ 12/24VDC
Wire Leads: 24 AWG, 3ft. long
Conduit Fitting: 1/2" Length, 3/4" outside thread,
1/2" inside thread

Mechanical Specifications

- Lock:** 8-21/32"L x 2-1/2"H x 1-39/64"T
Armature: 7-9/32"L x 2-13/32"H x 5/8"T
Case: Stainless steel

SECURITY DOOR CONTROLS

sdsecurity.com service@sdsecurity.com

EntryCheck™ 925

Outdoor/Indoor Keypad for gates and doors with up to 480 users

The SDC 925 EntryCheck™ is a stand alone digital keypad designed to control access of a single entry point for facilities with up to 480 users. Each user is assigned a personal identification number (PIN). Keypad entry of a valid one to six digit code activates one or both of the output relays which releases an electric door lock or triggers a gate operator.

Rugged Outdoor Design

The 925 EntryCheck™ is intended for extended service, indoors or outdoors, in tough commercial environments. The keypad is housed in a rugged, cast aluminum enclosure that can be mounted to a wall or pedestal. A keylock secures the housing to the mounting plate. The die-cast buttons feature bright, durable, easy to read, yellow graphics.

Operation

Pressing any key activates a courtesy light, illuminating the keys for two minutes. Verification of key presses is provided by audible and tactile feedback. If the user presses a wrong key, the * key can be used to reset and start over. When a valid PIN is entered the LED indicator turns from red to green and the programmed relay activates for the programmed time. Too many incorrect PIN entries will lock out the keypad. Keypad lockout is indicated by a yellow LED. An anti-passback feature prevents use of the same code twice before a programmed time period elapses. The EEPROM memory retains all entry codes and programming during a power failure.

Outputs

The EntryCheck™ features four independent outputs with four independent timers. Outputs #1 and #2 are Form "C" relay contacts. Outputs #3 and #4 are solid-state open collector outputs, short to common, which are used to signal forced entry, door ajar, lockout, shunt alarms, request to exit and keypad active conditions.

Features

- Keypad programmable
- 480 user codes
- 1 to 6 digit user codes
- 4 independent outputs
- 4 independent timers
- 2 Form C relay contacts
- 2 solid state open collector outputs
- Program entry codes to activate one or two relays
- Door sense input or disable input
- Request-to-exit/enter input
- Keypad tamper lockout
- Timed anti-passback
- Courtesy lamp
- Two LED status indicators
- Tactile key feel
- Audible code entry verification

Excel™ E6200 - Magnetic Lock

Application:

Security Access Control, & Mantraps, Indoor/Outdoor
1200 lb / 545 kg holding force magnetic lock for exterior, perimeter and interior door security and access control. Magnetic bond sensor and door status outputs are included for remote monitoring, mantraps and system application needs.

Standard Features

- Retrofits Securitron M62 and Locknetics 70 locks
- Magnetic Bond Sensor indicates door locked with full holding power
- Door Status indicates door open or closed
- Epoxy sealed electronics, tamper resistant and weatherized for indoor and outdoor use
- Stainless steel machine screws and blind nuts
- 10 ft [3.05m] jacketed, stranded conductor cable
- Dual voltage 12/24VDC
- Architectural stainless steel housing, US32/630

Mechanical Specifications

Holding Force: 1200 lbs / 545 kg

Housing: Stainless steel epoxy filled, all internal components sealed and weatherized

Lock: 8" L x 3" H x 1-49/64" D;
(203L x 73.5H x 45.7D mm)

Armature: 6" L x 13/16" H x 2-11/16" D;
(152 L x 20.63 H x 68.26 D mm)

Electrical Specifications

Wiring: 10 Ft [3.05 m] jacketed, stranded conductor cable for power input and status outputs

Circuitry: Voltage and current spike protection and instant release anti-residual magnetism circuitry

Voltage: 12/24VDC, field selectable

Magnetic Bond Sensor: SPDT, 250 mA @ 30VDC

Door Status Contact: SPDT, 250 mA @ 30VDC

Excel™ E1200 - Magnetic Lock

Application:

Security Access Control & Mantraps
1200 lb / 545 kg holding force magnetic lock for perimeter and interior door security and access control. Door and lock status outputs included for remote monitoring, mantraps and system application needs.

Standard Features

- Door status, lock status and Bi-color LED
- Interlocking quick mount assembly
- Adjustable mounting bracket with choice of self drilling and tapping mounting screws or machine screws
- Wire access chamber with terminal block
- Dual voltage 12/24VDC
- 628 Clear anodized aluminum

Mechanical Specifications

Holding Force: 1200 lbs / 545 kg

Lock: 10-1/2" L x 2-7/8" H x 1-5/8" D;
(266 L x 73 H x 41 D mm)

Armature: 7-5/16" L x 2-3/8" H x 5/8" D;
(186 L x 61 H x 16 D mm)

Electrical Specifications

Circuitry PC board with voltage and current spike

& Wiring: protection, instant release anti-residual magnetism circuit, terminal block for power input and status outputs

Voltage: 12/24VDC, field selectable

Current: 500 mA @ 12VDC; 250 mA @ 24VDC

Lock Status Contact: SPDT, 2 Amp @ 30VDC

Door Status Contact: SPDT, 250 mA @ 30VDC

ANSI/BHMA-A156.23
Grade 1 Compliant

632RF 2 Amp Power Supply

Modular Access Control Power Supply

Field Selectable 12VDC or 24VDC Output - Standard
Dual 12VDC and 24VDC Output - Optional

Quality, Performance & Versatility

The SDC 632RF Power Supplies have been developed specifically to support electric locks and access controls. The high performance, heavy-duty circuitry is ideal for inductive loads and multi-door applications. The modular design is built around several different application control modules to meet your specific needs for virtually any electric lock system. SDC power supplies are designed to provide a well organized installation for individual or multi-door systems that may include locking devices, access controls, station controls and consoles for remote control, annunciation and fire/life safety system interface.

Modular Design

Ten different, individually fused door control modules are available for virtually any application. Time delays, latching relays and multiple fuses are available for custom configuration in the field or at the factory.

DIP Switch Select System Operation

Specification of the UR Universal Access Hardware Controller provides for six standard DIP switch selectable system and mantrap variations for multiple door systems.

Manufactured & Tested to Rigorous Standards

SDC 600 Series power supplies are manufactured according to Quality Assurance standards. Tests are conducted according to tough UL criteria.

"Security Industry Finest"
ISC Expo

MADE IN
THE USA

Access Control Power Supply - ALVY
General Purpose Power Supply - QQFU/QQFV7

Features

Filtered and Regulated

The output filtering stabilizes the DC output voltage and eliminates AC line noise. The solid state regulator maintains the selected output voltage at 12VDC or 24VDC regardless of the output load changes, including battery charging.

Field Selectable 12 or 24VDC

The output is field selectable for 12 or 24VDC output.

Battery Charger Output

A separate PTC protected, battery charger output provides 13.5VDC or 27VDC.

LED System Status Indicator

Amber - AC and DC voltages are OK
Green - No DC output
Red - No AC input,
powered by batteries

Class 2 Output

Where permitted by code, conduit is not required for the Class 2 output.

Large Heavy Gauge Enclosure

Model 632RFA is housed in a 16 gauge, 16"W x 14"H x 6.5"D cabinet large enough to accommodate several additional modules and six 7 Amp hour batteries with plenty of room for wiring.

Value Added Features

Emergency Release Input (Standard)

A signal input from the fire life safety system turns off the secondary output releasing all failsafe locks. When not used for emergency release, this input may be used as main on-off control.

California Compliant Manual Reset of Emergency Release and AC Power Loss (Optional)

When this feature is required, should an AC power loss occur or the emergency release input is actuated, personnel must restore secondary output power manually at the power supply after the emergency release signal is reset and/or AC power is restored.

Low Battery Disconnect (Standard)

Batteries are disconnected from the output circuit prior to deep discharge preventing battery destruction.

Isolated Charging Circuit (Standard)

While the charging output is 13.5VDC or 27VDC, the secondary output is unaffected and precisely maintained at the selected 12 or 24VDC. This ensures system components are powered by their specified voltage.

The secondary output current is maintained at the full 2 Amp capacity and is not de-rated when charging batteries.

- (4) Fused, 2A SPDT dry outputs or voltage outputs
- (4) 2A SPDT dry outputs
- (4) N.O. dry trigger inputs

3.25"L x 2"W (83 x 51mm)

ACM-1

ACM-1 Access Control Module

Voltage input: 45mA @ 12/24VDC

- (1) SPDT voltage output
- (1) SPDT dry contact
- (8) SPDT trigger inputs (4-NC, 4-NO)
- (1) LED status indicator

5"L x 3.25"W (127 x 83mm)

14-2

Remote Monitoring

PSM Power Supply Remote Monitoring Module

The PSM Power Supply Monitoring module provides 2-SPDT, 1 Amp contacts to remotely monitor power supply and battery status. Input: 30mA @ 12/24VDC

Remote annunciation conditions include:

- System OK
- AC Fail - No DC Output
- Battery Powered
- System Off - No Battery

PSM

Performance Features

- Tested to meet Grade 2 specification of 150,000 cycles.
- Hardened 24mm throwbolt with saw-resistant hardened steel roller pin.
- Reinforced pin collar prevents against wrench attacks.
- Anti-drill design – Two (2) ball bearings inserted to prevent drill attacks.
- Available with SmartKey Technology.
- Compartmentalized packaging allows for quick and easy installation.
- Available with SmartKey Technology.

Single Cylinder

Double Cylinder

Certifications

- ANSI/BHMA A156.10 – 1995 Grade 2
- 2010 ADA Accessibility Guide (ADA Compliant)
- UL/cUL Listed (3 hours) for "A" label single-door applications (4' x 8') (1,219mm x 2,438mm)
- UL10C/UBC 7-2 (1997) Positive Pressure Rated
- UL10B Pressure Rated
- Barrier Compliant – Miami-DADE N.O.A. See page 72 for more details.

QDB285 Indicator

QDB288 Key Control

Product Specifications

- Door range – 1 1/8" – 1 3/4" (35mm-44.5mm). Consult factory for special door ranges.
- Backset – 2 1/2" (70mm) square standard, 2 3/8" (60mm) available.
- Exposed trim – Stainless steel with iron forged cylinder guard.
- Strike – Standard deadbolt strike 1 1/8" x 2 1/4" (32mm x 70mm). Other strike options also available.
- Latch bolt – Full 1" (25.4mm) throw with hardened steel roller.
- Faceplate – 1 1/8" x 2 1/4" (32mm x 57mm) standard. 1 1/8" x 2 1/4" (32mm x 57mm) faceplate available.

QED100 series Concealed Vertical Rod Exit Devices

Applications

The Heavy Duty QED100 series exit devices are designed for institutional, commercial uses such as educational, health care and industrial facilities where a long-lasting, highly durable product is required. These exit devices will deliver the operational requirements set forth while withstanding the physical abuse associated with the applied environment.

Performance Features

- Tested and certified to significantly exceed 1,000,000 cycles – well above the requirements for Grade 1 certification.
- Thru-Bolted trim design for increased security and durability.
- Wide variety of trim options to fit any job.
- Consistent styling allows for suiting with other K2 Commercial Hardware products.

Certifications

- ANSI/BHMA A156.3 Series Grade 1
- UL/cUL Listed (3-hours) for "A" Label Double Door applications (8' x 8') (2.438 mt x 2.438mt)
- UL10C/UBC 7-2 (1997) Positive Pressure Rated
- UL10B Pressure Rated
- UL305 for Panic Hardware
- ANSI A117.1 Accessibility Code (ADA Compliant)
- California State Reference Code (formerly Title 19 - Fire Marshall).

Product Specifications

- Handing – All QED100 series exit devices are non-handed.
- Door Thickness – 1 1/4" standard (44.5mm).
- Door Height – 7' standard with 84" rods; 8' optional with 96" rods (2.1336mt) (2.4384mt).
- Latchbolt – Stainless Steel 1/2" throw (12.7mm).
- Fasteners – Wood Screws, Machine Screws & Sex bolts standard.
- Head Cap & End Cap – Zinc die-cast.
- Trims – Sierra and Summit Styles available.
Escutcheon Offering – Dummy, Passage, Keyed, Night Latch.
Pull Plate Offering – Dummy, Thumbpiece, Night Latch, Flat Plate.
- Stile Width – 3 1/2" Minimum (89mm).
- Dogging – Hex key dogging and cylinder dogging available.
- 36" Field Sizeable to 32" Door
- 48" Field Sizeable to 36" Door
- Standard Backset: 2 3/8" (62mm) to face of door stop.

Keying

- Offered with the following keyway options: KW-Kwikset, WE-Weiser, SC-Schlage, GA-Yale, LA-Sargent, BF-Best "F" (SCIF) & LC-Less Cylinder. (SFIC) offered keyed different only. Consult factory for details on Mortise and Rim Cylinder requirements.

Warranty

Lifetime Mechanical & 3 year finish*

QDC

200 Series Grade 1 Heavy Duty Door Closers

STANLEY

Performance Features

- Tested to significantly exceed the performance requirements for Grade 1 certification.
- Fully adjustable from 1-6 allowing for maximum flexibility.
- Delayed Action and Backcheck are standard in the same door closer body.
- All weather oil insures optimal operational performance in multiple climate conditions.
- Sized for interior doors to 5'0"; exterior doors to 4'6".

Certifications

- ANSI/BHMA A156.4 Series Grade 1
- ANSI A117.1 Accessibility Code
- UL/cUL listed (3-hours) for self-closing doors without hold-open
- UL10C Positive Pressure Rated
- UL10B Pressure Rated

Product Specifications

- **Handing** – All QDC200 series door closers are non-handed.
- **Material** – Cast aluminum.
- **Cover** – Slim-line plastic cover standard. Full, architectural plastic cover also available.
- **Arms & Brackets** – Tri-pack standard (Regular, Top Jamb, Parallel configurations). Hold Open and Dead Stop arms also available.
- **Arm Material** – Heat treated carbon steel.
- **Springs** – High impact hand drawn steel wires.
- **Pinions** – Heat treated chrome molybdenum steel.
- **Cylinder construction** – Heat treated free-cutting carbon steel.
- **Fasteners** – Wood and machine screws standard. Sex nuts and bolts optional.

WHERE IT ALL BEGAN
3/4" RIM PANIC SOLUTION

TRINE
ACCESS TECHNOLOGY

4800 Series

- For use with surface mounted rim exit devices with up to 1" throw. For use in new or replacement installations in wood or metal door frames and tight installs.
- No cutting of the frame
- Comes with Trines Patented 4-Pin Anchoring System for strength and stability. (See page 12 for details)
- Cavity is completely open – which means the 4800 allows for an incremental depth up to a 1" throw – Competitor back plates do not allow for this versatility.
- Built-in electronics automatically allow 11 through 28 AC and DC Voltage input – with surge and kickback protection.
- Contains a one piece locking mechanism with one solenoid.
Less parts mean less problems.
- Fail-safe/Fail-secure Field selectable.
- BHMA Grade 1 Electric Strike:
+ 1,500,000+ Life cycles
+ 3,000+ lbs. Holding Force.

The 4800

Electronics allow for PLUG and PLAY capability

Electric Characteristics

Voltage	Pull In/Hold Amps	Duty	Sound

- f. Powdercoat then clear coated faceplates available on certain styles
- g. Wire nuts

Custom Specifications

BEA proposes a variety of custom solutions for your push plates:

Abrasive Etching/Engraved – This method creates a very accurate and deep "scratch" in the plate that is then filled with paint to create the custom logo/text on the surface of the plate.

Pad Printed – Logo/text is stamped onto the surface of the steel plate using a special pad. The logo is only printed on the surface of the plate.

Embossing – This process requires the use of a special tool designed to punch the back of the face plate with the custom information. A special coating is added to create a dramatic 3D embossing for your push plate.

ELECTRICAL DATA SPECIFICATIONS

- Power input: 115 VAC \pm 15% 60 Hz
- Current draw: 2A maximum (4 maximum number of operators per breaker)
- Auxiliary output: 24VAC @ 0.125A maximum
- Solid state output can signal electric strikes
(For powering strikes see page 7.)

Certifications

- ANSI/BHMA A156.19 certified Standard For Power Assist And Low Energy Power Operated Doors
- UL 325 Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems or use on fire and smoke check doors
- UL 228 Standard for Door Closers-Holders, With or Without Integral Smoke Detectors
- Meets requirements for UL 10B, 10C and UBC 7.2 for positive pressure
- Meets ADA – Americans With Disabilities Act
- Complies with ANSI 117.1 section 4.13
- In compliance with FCC 47 CFR Part 15 Class B emissions requirements (USA)

**Exterior Finishes**

- 628** – satin aluminum, clear anodized
313AN – dark bronze anodized

Warranty

Two years from the date of invoice

Package Includes:

- D-4990 Low Energy Operator (Non-handed)
- Standard Arm (PUSH side) or Track Arm (PULL side)
- Mounting template
- Technical manual
- Door closer spring adjustment wrench
- Tuning screwdriver
- Signs (see page 11)

HOW TO ORDER D-4990/D-4990T

TYPICAL SYSTEM APPLICATIONS

D-4990 Low Energy Operator with PUSH-PULL

Operation:

- Free ingress & egress using low energy operator or bypassing the operator and using door manually
- Door operator acts as standard door closer when entering or exiting manually

Material:

- Precision Low Energy Operator
- 2 Precision Door Actuators or Push and Go
- Local Power

D-4990 Low Energy Operator with Concealed Mag Lock for Glass Door Applications

Operation:

- Free entry when security system is shunted or off
- Entry after hours by card reader, which unlocks & activates low energy operator
- Free egress at all times by touching push bar or using inside actuator, which de-energizes mag lock and activates low energy operator

Material:

- Precision Low Energy Operator
- Electromagnetic Shear Lock and Power Supply (PS)
- Electrified Pivot
- Touch Bar Sensor Kit (TBSK) by others PUSH-PULL set
- Terminal Interface Enclosure (TIE)
- BEST Card Reader
- Precision Actuators

D-4990 Low Energy Operator with Vestibule

Operation:

- When exit device is dogged low energy operator can be activated by external actuator
- When exit device is locked (Not Dogged) all actuators are disabled (Ex: After hours at a school or library)
- Recommended dual vestibule actuator will re-open internal or external doors (Ex: Student waiting for parent pick-up)

Material:

- 2 Precision Low Energy Operators
- 2 Precision Actuators (Internal, External)
- 1 CL2388 Precision Dual Vestibule Push Plate (Recommended)
- Optional Precision Interior Vestibule Actuator
- Precision Exit Device with Cylinder Dogging
- Stanley Power Transfer Hinge
- 1 Precision Exit Dummy Trim

TYPICAL SYSTEM APPLICATIONS

D-4990 Low Energy Operator with Electric Strikes

Operation:

- Doors are to be closed and latched (Example: Fire Doors)
- Key switch shunts exterior actuator (Example: After hours traffic control)
- When not shunted, actuators will signal electric strike power supply and activate auto operators
- From secure side, egress by manually pushing exit devices or using inside actuator to activate auto operators

Material:

- 2 Precision Vertical Rod Exit Devices
- Electric Strike & Precision PS490 Power Supply (PS)
- Key Switch
- 2 Precision Actuators
- 2 Precision Low Energy Operators

Electric Strikes

D-4990 Low Energy Operator with Latch Retraction

Operation:

- Doors are to be closed and latched at all times
- When activated, latch bolts are retracted and door(s) will automatically open
- Non-rated devices can be dogged for push/pull operation

Material:

- 2 Precision Low Energy Operators
- 1 Precision Power Supply
- 2 Stanley Electric Hinges
- 2 Precision Exit Devices with Electric Latch Retraction
- 2 Precision Actuators
- 1 CL2388 Precision Dual Vestibule Push Plate

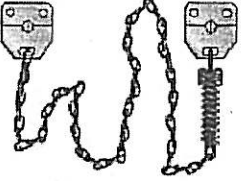

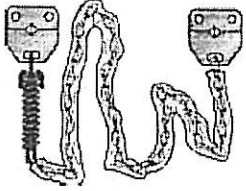

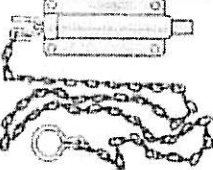

Latch Retraction

RIM EXIT DEVICES

S300
Standard

S301
Optional

S458
Optional

S988
Optional

Apex 2100 Series - Reversible

Apex FL2100 Fire Exit Series - Reversible

DOORS - For all types of single and double doors with a mullion. For mullions, see page 18. Available for 1-3/4" to 2-1/4" thick, up to 4'-0" wide opening. For thicker doors, consult factory. Furnished standard for 1-3/4" thick, 3'-0" wide opening.

DEVICE - Covers ANSI A115.2 (Type 161), A115.18 cylinder lock and A115.1 (Type 86) Mortise Lock preparation.

FUNCTIONS - Functions are field selectable except for the Double Cylinder option. The device is furnished for a desired function if specified. If not specified the "03" function is furnished standard.

DOUBLE CYLINDER - Handed, "10" Function available. Requires two rim type cylinders, not furnished standard. See page 5 and 19.

BASE MATERIAL - The Cover, Touchbar, Device Channel, Lock/Hinge Side Filler and End Cap are furnished of heavy wrought Brass, Bronze or Stainless Steel. 628 Devices are furnished with Aluminum, Brass, Bronze and Stainless Steel components. See "Finish & Base Material" chart page 3.

CHASSIS - Investment Cast Steel, Zinc Dichromated.

LATCHBOLT - Stainless Steel, Deadlocking, 3/4" throw.

STRIKES - No. S300, Investment Cast Stainless Steel, Black Powder Coated furnished standard. No. S988, optional strike for use on Aluminum Door applications, please specify when ordering. No. S458, optional strike for use on Mullion applications, please specify when ordering. For optional strike information see page 34.

DOGGING - 1/4" turn hex key dogging standard. NOT available on Fire Exit Hardware.

TOUCHBAR HEIGHT - 39-15/16" from floor standard. May be varied as situation dictates.

REVERSIBLE - Reversible for all functions and Trims. Standard packaging RHRB.

UL LISTED - Panic and Fire Exit Hardware. For FIRE EXIT HARDWARE Ratings see page 33. Conforms to UL10C and UBC 7-2.

ANSI/BHMA - Devices are BHMA certified for ANSI 156.3, Grade 1.

FINISHES - 605, 606, 612, 613, 625, 628, 630. For Finish description see page 3.

CYLINDERS - Rim Type, not furnished standard. Specify when required. For cylinder details see page 19.

STILE WIDTH - See Stile Information on page 36.

RETROFIT APPLICATIONS - The 2100 and FL2100 Series Devices are designed to retrofit into other manufacturers' mounting hole locations. 1700 Series Pull Trim and 4900 Series Lever Trim may also be factory set for these applications by specifying prefix "R" (e.g. 2108 R4908A). Consult factory for details.

Apex 21 Series - Nonhanded

The 21 Series Device is designed to be compatible with many manufacturers' Access Control exterior trim. The device incorporates a center driven cam to receive the tailpiece of the access control product. The tailpiece rotation required to retract the latch is a minimum of 50 degrees.

Consult factory for details.

DEVICE OPTIONS

Prefix	Description	Page

V4908A

Vandal Resistant Trim

A heavy duty lever trim designed to withstand abuse and vandalism. Composed of extra strength shock-absorbing "overload" springs and heavy duty investment cast stainless steel internal components. Lever returns to the "home" position eliminating the need to reset the lever.

Retrofit Applications

The R4900 Series Trim is designed to retrofit into other manufacturers' installations when used with the wide stile Apex Series Devices. Consult factory for details.

1. All the escutcheons and levers are castings or forgings.
2. Specify Lever or Knob Design (A,B,C,D,K) and Handing ("A" Lever x RHRB furnished standard)
3. 626 Trim furnished for 628 and 630 Devices.
 - For Trim dimensions see page 38.
 - Trims are BHMA certified for ANSI 156.3, Grade 1.
 - Trims are through bolted and will cover 161 and 86 cutouts (except for 2000C Trim).
 - Cylinder, Rim Type, not furnished standard. For cylinder details see page 19.

Folger Adam®

Industrial grade electric strikes for use with rim exit devices

fire rated

UL 1034
burglary listed

grade 1

These heavy duty electric strikes offer amazing versatility. Both the 310-4 and 310-4S come with a standard 3/4" thick faceplate, suitable for metal frames. For aluminum frames, an integrated shim quickly unscrews to create a 1/2" faceplate.

Applications

310-4

For up to 3/4" pullman style latchbolts on single doors

- PK keeper standard

310-4S

For squarebolt style latchbolts like

- Corbin Russwin® ED4200S, ED5200S and ED5200SA SecureBolt™
- Yale® 7150(F), 7250, 7270M(F) Squarebolt® Exit Devices
- SK keeper standard

Specifications

- UL 10C, 3 hour fire-rated (fail secure only)
- CAN4-S104 (ULC-S104) fire door conformant
- UL1034, burglary-resistant listed

- ANSI/BHMA A156.31, Grade 1
- NFPA-252 fire door conformant
- ASTM-E152 fire door conformant

300 Series

rim exit devices
